PROFESSIONAL SUMMARY

Software Engineer with 4.5+ years of experience building scalable web applications using JavaScript, TypeScript, React, and Next.js. Strong in creating clean, reusable UI with Material UI and Tailwind CSS, and delivering pixel-perfect user experiences. Experienced in backend development with Node.js, PHP, Laravel, REST/GraphQL APIs, databases, Docker. Collaborative team player with Agile experience and strong problem-solving skills.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP

Frontend: React.js, Next.js, Material UI, Tailwind CSS, HTML, CSS, Redux, Formik, Yup

Backend: Node.js, Express.js, Laravel, REST API and GraphQL Development & Integration

Database & ORM: MySQL, PostgreSQL, MongoDB, Eloquent ORM, Mongoose

Cloud & Tools: AWS (S3), Docker, Git (GitHub, GitLab, Bitbucket), Postman, Jira, Trello

EXPERIENCE

Success.ai

Aug 2024 - Mar 2026

Full Stack Developer

Remote

- Developed and maintained scalable full-stack applications using the **MERN stack** with a focus on performance, modular architecture, and user experience.
- Built and customized **White-label SaaS solutions**, enabling clients to launch fully branded outreach platforms tailored to their business requirements.
- Developed the **DFY (Done-For-You) onboarding system** for white-label customers, allowing users to purchase, configure, and manage email accounts seamlessly within the platform.
- Integrated third-party platforms including **Zapier** and **HubSpot** to automate workflows, CRM synchronization, and lead management processes.
- Built and maintained multiple **email infrastructure and deliverability tools** including SPF, DKIM, DMARC, SSL, blacklist monitoring, spam checking, and email verification utilities.
- Optimized backend APIs, database queries, and asynchronous workflows, improving application scalability, email processing efficiency, and overall platform reliability.

Tmedia Business Solution

May 2022 - May 2024

Full Stack Developer

Ahmedabad, India

- Developed scalable and responsive web applications using **React.js, Next.js, Laravel, PHP, Node.js, and TypeScript** for business-focused solutions.
- Built reusable frontend components and optimized user interfaces to improve application performance and user experience.
- Designed and implemented robust backend APIs using **Node.js, Express.js, Laravel, PHP, and PostgreSQL**, ensuring secure and efficient data handling.
- Integrated real-time communication features using **Pusher** for seamless interaction between users and administrators.
- Improved application speed and SEO performance through **server-side rendering (SSR)** and frontend optimization techniques.
- Collaborated with cross-functional teams in Agile environments to deliver production-ready features and maintain high code quality.
- Worked on debugging, performance tuning, and feature enhancements to improve scalability and reliability across applications.

Geetaxmi Technologies

Feb 2021 - Mar 2022

Jr. Software Developer

Remote

- Worked on multiple web-based applications, contributing to both frontend and backend development using **Laravel, PHP, HTML, CSS, and JavaScript**.
- Developed and maintained modules for employee management and loan management systems, improving operational workflows and data handling.
- Built scalable backend functionalities and responsive user interfaces using the **Laravel framework**.
- Contributed to mobile application support services and API integration to enhance user accessibility and application performance.
- Worked on an IoT-based mining management system, developing features for employee tracking, equipment management, and maintenance monitoring.

EDUCATION

Shri Brahmanand Institute of Tech. edu. (BKNMU)	2017 - 2020
Bachelor of Computer Application - CGPA – 7.9	Junagadh, India
Shree Sardar Patel Vidhaya Mandir (GHSEB)	2015 - 2017
Higher Secondary Class XII	Junagadh, India

PROJECTS

AI-Powered Email Deliverability & Outreach Platform

Aug 2024 - Mar 2026

- Developed email infrastructure tools including SPF, DKIM, DMARC, SSL, blacklist monitoring, and email verification utilities.
- Implemented AI-powered tools such as Email Copy Writer, Subject Line Generator, Spam Checker, and Grammar Checker.
- Built White-label and DFY onboarding features for branded outreach platforms and email account management.
- Integrated third-party platforms including Zapier and HubSpot for workflow automation and CRM synchronization.
- Developed Spintax email generation for personalized large-scale cold email campaigns.

Telagri

Oct 2023 - Jun 2024

- Developed a real-time communication platform enabling seamless interaction between farmers and specialists using **Laravel, React.js, and Pusher**.
- Implemented role-based workflows for chat request handling, session management, and communication control.
- Built and integrated scalable backend APIs and responsive frontend modules for smooth user experiences.
- Optimized image processing and thumbnail generation to enhance platform performance and reduce loading times.
- Collaborated within a cross-functional Agile team to deliver scalable and maintainable application features.

Dzitra

Apr 2023 - Oct 2023

- Created a no-code/low-code platform with drag-and-drop functionality for building dynamic web applications using **Next.js, Node.js, TypeScript, and PostgreSQL**.
- Built reusable frontend components and scalable backend services to improve development efficiency and maintainability.
- Enhanced application performance by optimizing rendering, reducing build size, and implementing efficient server-side rendering (SSR).
- Worked closely with a team to deliver production-ready solutions, feature enhancements, and system optimizations.
- Improved debugging processes and application architecture for better scalability and long-term maintainability.

Edification

May 2022 - Apr 2023

- Developed backend and frontend modules using **Laravel, React.js, MongoDB, and Google Maps API** for an educational management platform.
- Implemented live bus tracking and route visualization features using real-time location coordinates.
- Built dynamic forms and reusable CRUD functionalities for efficient management of educational data.
- Created reusable input components and configurable field structures to improve development flexibility.
- Optimized application workflows and improved overall user experience through scalable frontend architecture.

IoT Mining Management System

Aug 2021 - Mar 2022

- Contributed to the development of an IoT-based mining management platform for employee and equipment tracking.
- Developed modules for equipment maintenance, spare parts management, and operational monitoring using **Laravel and PHP**.
- Built tracking and reporting functionalities to manage employee activities and equipment status efficiently.
- Integrated responsive frontend components and backend APIs to ensure reliable real-time data handling.

Loanzy - Employee Loan Management Platform

May 2021 - Aug 2021

- Contributed an employee loan management platform to manage loan applications, approvals, repayment tracking, and savings records.
- Built backend functionalities using **Laravel and PHP** with secure database management and optimized workflows.
- Designed responsive frontend interfaces using **HTML, CSS, JavaScript, and Bootstrap** for smooth user interaction.
- Implemented employee account management, reporting modules, and financial tracking features for efficient operations.
